BDAV 2008 Annual General Meeting

Join us for the BDAV's 2008 Annual General Meeting, which will feature:

- an update of BDAV activities over the past 12 months;
- **'Designer Profile'**, featuring Michael O'Sullivan of Vibe Design Group, who won the 2008 BDAV Building Design of the Year;
- **'Guest Speaker'** segment featuring two specialists from Architectural Window Systems who have a long background in designing window and door systems:

David McCleary – one of Australia's most pre-eminent aluminium window and door system designers, with a history of 40 years' experience in this field. David will present a historical view of Australian windows and doors with a practical vision and real time examples of the latest current solutions available in Australia, including manufacturing thermally broken aluminium windows and door systems. His charismatic presentation style reflects his deep knowledge and passion for aluminium window design and development.

Michael O'Keefe – serves on AWS' Technical Committee. He will present an overview on the ever-changing nature of energy ratings in window and door systems, including the relationship and software systems and Section J. In the continually changing landscape of regulatory change, Michael will offer some streamline solutions towards rating your project requirements.

The event will be supported by presentations from **James Hardie** and **Decorative Imaging**.

Our events fill quickly. Book today to secure your place.
Please scroll down to the link at the end of this invitation to register.
